

Landing Page V1 Feedback

- Really like the header and the top banner, think these work really well, and the colour scheme is good.
- I think the 'What we offer' banner needs to go second.
 - Please can you put this content second from the top.
 - Please can you try to re-arrange the contents to be more succinct and clearer, even if it means separating out into a couple of sections.
 - Can you find/create an image/icon that works well for this section.
- I want it to flow more, I know I provided separate banners for the content, but I would like to try and get a continuous style (after the initial banner if possible) similar to that of the gamebake.io
 - I had an idea of using coloured 1's and 0's as a trailing path to join the different bits of content together. I tried to do it in the header of the mock up I provided (if you expand it) - maybe this won't work, its just an idea
 - Or coloured PCB traces ?
- Do you have any ideas of how to make it flow more (more continuous)?
- Is it clear to you what our business does?
 - If not, what questions do you have ? (Useful feedback for us for the content)
- Open for other suggestions or ideas you may have too
