

Design Icon V1 Feedback

- Very impressed with the first effort,
 - colour scheme looks really good
 - General format is inline with expectations
- Title 'Design' can be removed from the image
- Remove the '1's and '0's off the design board
- Replace writing on bottom left (beneath hat) with:
 "Part Nr.: 2106-2099-6331
 Material: Unobtanium
 Quantity: 1"
- Replace the writing near the cog (top) with:
 "Part Nr.: 2225-2567-9595
 Material: Adamantium
 Pressure Angle: 20°"
- Replace the writing beneath the head with:
 "Part Nr.: 4128-7009-4555
 Material: Atium"
- Replace writing beneath body with:
 "Part Nr.: 8755-5418-9144
 Material: Vibranium"
- I know the text is intentionally small to make it almost unreadable but its some nice Easter eggs for myself at least.
- We usually use the following box on the bottom right of technical drawings, so if you could incorporate it (or similar) on the drawing canvas, maybe bottom centre, that would be great ?
